NOTE XIX.

FAUNA SIMALURENSIS.
LEPIDOPTERA RHOPALOCERA, FAM. LYCAENIDAE.

BY

R. VAN EECKE.

The Lycaenidae, collected by Mr. Edw. Jacobson on the island Simalur and neighbouring islets, were represented by twelve known species, which differ more or less from those from Sumatra and Nias. Ample descriptions, figures and contemplations will soon follow in this periodical.

1. *Miletus boisduvali* Moore. ♀. N° 6048.
   Hab. Pulu Pandjang, 2/1913.
2. *Allotinus subviolaceus* Feld. 2 ♂ & 1 ♀. Nos 6049—6051.
   Hab. Sinabang (Simalur), 2/1913.
3. *Lycaena malaya* Horsf. 1 ♂ & 4 ♀. Nos 6052—6056.
   Hab. Pulu Pandjang, 7/1913.
4. *Lycaena ethion* Doubl. & Hew. ♀. N° 6057.
   Hab. Pulu Babi, 4/1913.
5. *Lycaena strabo* F. 2 ♂. Nos 6058—6059.
   Hab. Sinabang (Simalur), 1/1913.
6. *Lycaena celeno* Cram. 1 ♂ & 3 ♀. Nos 6091—6094.
   Hab. Simalur: Sinabang, 2/1913, Labuan Badjau, 4/1913. — Pulu Babi, 4/1913.
7. *Lycaena kankena* Feld. 2 ♂. Nos 6095—6096.
   Hab. Simalur: Sinabang, 3/1913, Labuan Badjau, 4/1913.
8. *Poritia erycinoides* Feld. ♀. N° 4330.
   Hab. Sinabang (Simalur), 1/1913.
9. *Eooxylides tharis* Hübn. ♀. N°. 6097.
   Hab. Labuan Badjau (Simalur), 6/1913.
10. *Marmessus lisias* F. 3 ♂ & 3 ♀. Nos 6098—6103.
    Hab. Pulu Babi, 4/1913; Simalur: Labuan Badjau, 6/1913, Sigulè, 8/1913.
11. *Deudorix epijarbas* Moore? ♀. N° 6060 (very damaged).
    Hab. Lasikin (Simalur), 6/1913.
12. *Amblypodia apidamus* Cram. ♂. N° 6104.
    Hab. Pulu Pandjang, 2/1913.

It is very remarkable, that on the islet Pulu Babi (very close to the island Simalur) we find several races, which differ from those of Simalur, while on another islet, Pulu Pandjang, the specimens do not show any difference.

Leyden Museum, April 1914.
